Key features: Dynamic air removal system • 4 unique preset cycles and 5 custom cycles • Automated compliance documentation • Large 11" x 18" chamber • Intuitive user interface

Description

Midmark® Steam Sterilizers are designed to help make instrument processing as easy and automated as possible. An intuitive user interface with onscreen guidance, helpful notifications and step-by-step touchscreen prompts helps streamline training, cycle operation and routine care. Automated features such as mechanical monitoring and chemical indicator reporting can help simplify compliance documentation, save time and reduce stress for your team.

Indications

- Determine cycle status—cycle in progress, cycle complete and cycle error—from a distance with a progressing color-coded LED light bar, large cycle-countdown clock and audible cues.
- Stay audit-ready with device reminders and notifications, user authentication, unlimited storage of routine care events for the life of the sterilizer and automated cycle recordkeeping.
- Operate in your preferred language with display options of English, French or Spanish.

Unique Attributes

- Large chamber capacity accommodates bigger cassettes and multiple instrument loads, improving efficiency during high-volume days.
- Integrated digital touchscreen with real-time cycle progress display and user tracking for accountability and compliance.
- Offers 4 unique preset and 5 custom cycles for simplified sterilization.
- Advanced drying technology provides consistently dry instruments with reliable end-of-cycle performance.

Clinical Tips

- Do not overlap instrument packs; always load with the paper side down to ensure proper drying.
- Allow the sterilizer to complete the full dry cycle before opening the door to prevent error codes and ensure optimal results.

"I REALLY LIKED THE FRONT SCREEN AND THE DIGITAL PROGRESS BAR — IT'S A GREAT-LOOKING AND INTUITIVE UNIT."

Evaluators' Comments

"The new M11, with all its upgrades and easy-to-use features, makes sterilization more efficient."

"It has been helpful on days when we have multiple hygienists and doctors and instruments need to be ready throughout the day."

"Each feature on this equipment is better than the current system that we already use."

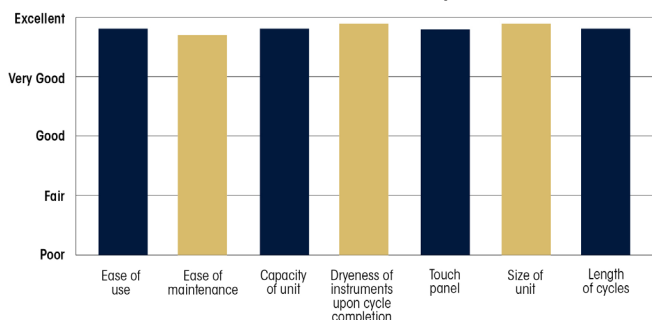

"Dries instruments completely and records all cycle information, while also tracking which user has removed instruments from the sterilizer."
